Art Unit: 3712

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a display system, classified in class 348, subclass 739.
- II. Claims 19-28, drawn to a method of teaching motor skills, classified in class 434, subclass 257.
- III. Claims 29-32, drawn to a computer system, classified in class 345, subclass 328.
- IV. Claims 33-36, drawn to a method of mixing electronic signals, classified in class 348, subclass 659.

Inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions of groups I-IV have different functions. The invention of group I is solely for image output. The invention of group II is for improving the motor skills of a human being. The invention of group III is for the collection and processing of data. The invention of group IV is a method for combining electronic data signals.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
